Overview

The Autosobriety Training Programme consists of educational tools that aim to **contribute to reduce and prevent alcohol-related traffic fatalities and injuries.**

TARGET
9
2030
↓ 50%

By 2030, halve the number of road traffic injuries and fatalities related to drivers using alcohol, and/or achieve a reduction in those related to other psychoactive substances.

SDG 3.6

By 2030, halve the number of global deaths and injuries from road traffic accidents

The Programme educational tools include:

An interactive online course available at **UNITAR's Virtual Learning Environment:**

https://www.unitar.org/event/full-catalog/autosobriety-training-programme-prevent-drink-driving

Practical exercise that includes the use of Virtual Reality (VR) glasses to experience the effects of alcohol on driving performance

A microlearning course available at **www.edapp.com/educate-all**
In the Course Library, look out for "UNITAR – Road Safety" Category
